

Making Figures of Embedded Activities (E.g., PHET Activity)

For embedded PHET activities, the HTML will look like something like this:

```
<iframe src="https://phet.colorado.edu/sims/html/graphing-quadratics/latest/graphing-quadratics_en.html">
```

The `[caption][ /caption]` tags will not work to turn this into a figure like the others. Instead, we will do this manually.

Insert `<figure></figure>` and `<figcaption></figcaption>` tags:

```
<figure>  
  <iframe src="https://phet.colorado.edu/sims/html/graphing-quadratics/latest/graphing-quadratics_  
  <figcaption>Figure X.X</figcaption>  
</figure>
```

It should look something like this:

Figure X.X
